

ARMORED CASH IN TRANSPORT VEHICLES FOR SAFE TRANSPORT OF LIVES AND VALUABLES

SSAB is a world leader in quenched and tempered steel. Our understanding of how each step affects the properties of the steel and the ability to fully control the complete process is how SSAB can offer you the superior range of protection steel.

We offer you the markets most comprehensive product range. We will always find the optimal grade and dimensions for your application, whether it is hardness, toughness, total weight requirements or the machinability that is your challenge.

Armox product portfolio offers excellent ballistic properties in combination with high hardness and strength. Our products are developed for applications where blast protection or high ballistic resistance is required, such as in car systems for transport of valuables. Our steel offers the advantage of steel including the toughness required for withstanding multi-hits and the machinability to simplify your design and production process. Furthermore, as a customer you will always feel safe by the certified quality process our plate goes through.

THE ADVANTAGE OF USING ARMOX STEEL

For Cash Mgmt companies	For the producer	For the regulator
Safer vehicle	Thermal cutting – higher speed	Globally known producer
Lighter vehicle due to thinner steel and less fuel consumption	Excellent form- and weldability	Approved product for many different standards worldwide
The vehicle is lighter and easier to operate and maneuver and a lower-class driver's license might suffice	Shorter lead time in production	Local stocks and technical support world wide
