Nordic craftsmanship for global designs

GreenCoat® exists to help architects, designers, and tinsmiths in bringing contrast and creativity to the world. Our palette has 15 curated colors — and for those seeking something beyond, we also offer custom options. No matter which color you choose, they all contain rapeseed oil — a unique Nordic formula proven to endure all kinds of weather.

UP TO **25-YEAR**
aesthetic guarantee

UP TO **50-YEAR**
technical guarantee

Easy to work with

With no spring-back, our color coated steel is easy to form — either by hand or with machines. Unlike many other metals, it can be bent at temperatures as low as $-15\text{ }^{\circ}\text{C}$ without cracking, enabling installation during any season.

Designed to last

Our color coated steels come with a 50-year technical guarantee. It's crafted from a multilayer system such as a 350 g/m^2 layer of zinc and a $50\text{ }\mu\text{m}$ coating layer. This makes it durable and scratch resistant even in the most demanding conditions. It also offers the lowest thermal expansion of all metals, which prevents buckling and deformation for decades to come.

Made for creative designs

No roof design or façade shape is too complex for our steels. In addition to conventional standing seam technique, our color coated steels can also be used to create fascias and gutters.
