EXTREME WEAR RESISTANCE—A FOUNDATION FOR GROWTH

The rapid worldwide growth of Hardox Wearparts® is an unparalleled success in the steel aftermarket business. The first centers were opened in 2000 in Europe. As the name implies, when Hardox Wearparts® was established it was closely linked to the industry-leading Hardox® wear plate. Through a close collaboration between SSAB and its customers, more and more applications were found for Hardox® due to its extreme wear resistance. Today, Hardox® wear plate is complemented by other steel grades such as Duroxite™ overlay products, Strenx™ performance steel and Toolox® engineering & tool steel. Hardox Wearparts® is a true one stop shop for wear products and services.
